Water quality project named award finalist

The Prior Lake-Spring Lake Watershed District was named one of three finalists for this year's Minnesota Association of Watershed Districts Project of the Year Award.

The Watershed District got the nod for its Fish Point Park Water Quality Project located at 15111 Fish Point

Road, Prior Lake. The project included four elements: a wetland enhancement, a water control structure, a prairie restoration, and an iron-sand filter.

The project was completed through a partnership between the Prior Lake-Spring Lake Watershed District and

the City of Prior Lake, and partially funded by a grant from the Board of Water and Soil Resources' Clean Water Fund program.

To learn more about the project, visit the District's website (www.plslwd.org) or call the District at 952-447-4166.
