Southwest metro prepares for a wetter future

How can I be ready?

One of the best things individuals and families can do to protect themselves and their property from extreme weather events is to be prepared. This means having an emergency plan in place, knowing what to do in the event of a storm, and being aware of the risks associated with certain weather conditions.

In the case of a wetter future, it is important to consider how this may impact your community and what steps you can take to be prepared.

Insurance

The insurance industry has a crucial role to play in preparing for a wetter future. Insurance companies can help individuals and families understand the risks they face and design policies that can provide coverage in case of extreme weather events.

Local government

Local governments can also play a role in preparing for a wetter future. They can provide information and resources to residents, design infrastructure that can withstand extreme weather events, and work with other agencies to develop emergency plans.

Preparation tips

To be ready for a wetter future, here are some tips that you can follow:

- Stay informed about weather conditions and be prepared to take action when necessary.
- Have an emergency plan in place and make sure that all family members know what to do in case of a storm.
- Ensure that your home is prepared for extreme weather conditions, such as by securing loose items and making sure that your roof and windows are in good condition.
- Have emergency supplies on hand, such as food, water, and medical supplies.
- Consider purchasing flood insurance to protect your property.

By being prepared, you can help ensure that you and your family are safe and secure in case of extreme weather events.
